

Teodor Lazarovski, Pharm.D.
Senior Associate, Regulatory Strategy

Teodor Lazarovski is a Senior Associate of Regulatory Strategy at Advyzom. Teodor acts as a regulatory primary US Agent for companies in various phases of development. Teodor can support regulatory strategy development on INDs, CTAs, NDAs, BLAs, Fast Track Designation, and Orphan Designation applications in compliance with Health Authority regulatory requirements. Teodor routinely performs regulatory landscape and precedent research in order to input into regulatory scenario analyses and regulatory strategic plans. He collaborates on the development and/or management of regulatory project plans and content plans. Teodor works with companies to ensure compliance with IND and NDA/BLA requirements.

In his previous role at Takeda Oncology, Teodor worked as a Global Regulatory Affairs Fellow in supporting submission of a US NDA, leading to a successful drug approval. He prepared regulatory submissions, including post-marketing requirements and commitments, protocol and clinical information amendments, and annual reports. He led cross-functional teams in the authoring and development of responses to information requests from the FDA and expedited their resolution and tracking. He managed the end of trial patient access program for a clinical trial and has submitted clinical trial applications.

Teodor earned his Doctor of Pharmacy degree from Regis University, Denver, Colorado.
